

## Tiara Yachts EX60

Next big step.

Tiara Yachts has always been a harbinger of things to come. Utilizing the latest technology, its designs are forward thinking and geared toward optimizing safety, comfort and enjoyment while on the water. With the introduction of the EX60 — its largest model to date — the Holland, Michigan-based company has once more defined what possibilities are yours aboard this splendid build.

“For this particular design, we’ve blended elements we know are proven in our outboard line and take portions we’ve learned from the inboard models,” says Tom Slikkers, CEO and president of Tiara Yachts.

The 60-foot EX60 offers four different configurations for alfresco or aft cockpit modules, each one presenting an exciting opportunity for dining, cruising and even dropping a line for fishing. You can select the mid breakfast bar module with ottoman seating or the forward- and aft-facing seat module. You can also choose from

the lounge module or adventure module aft, which allows for multiple fishing configurations.

Enter the main salon through glass doors and, with the seamless integration of galley and interior entertainment area, your onboard experience is almost complete. Three private staterooms and two heads are below deck. There are multiple Ultraleather options for the exterior and interior upholstery, and you’re able to fully customize bedding options. There are also plenty of storage areas for you and your guests while away from your home port.

“We’ve worked to accommodate the cruising proficiency and mix that with dayboating,” Slikkers adds.

The EX60 will offer multiple twin IPS options paired with the latest Volvo and Garmin technology, including Assisted Docking. A long list of standard and optional equipment will make your Tiara EX60 a very personal experience. ★
